

Video Everywhere Release Notes: Nov 2012

Release Information

Launch Date: November 28, 2012

Requirements: Service Pack (SP) 10 and later

Supported Platforms

Video Everywhere is a content editor building block enhancement (9.1.100402). Once installed and activated, a new icon called **Record from Webcam** is added to the content editor that controls your webcam.

It is supported on Blackboard Learn [9.1 SP 10](#) (Build: 9.1.100401.0) and later.

How to Install and Activate Video Everywhere

1. Download the Video Everywhere building block from Behind the Blackboard Downloads home, located under Feature Building Blocks for Learn. Save the file on a local drive. Unzip the package to access the `.war file`.
2. Navigate to the System Admin panel. Click **Building Blocks**.
3. Click **Installed Tools**.
4. Click **Upload Building Blocks** from the action bar.
5. Browse for the Video Everywhere building block `.war file`.
6. Click **Submit**.
7. You will get a success message when the building block is installed. Set the building block to **Active** and click **Approve**.
