- [Download the .war file.](#)

To learn more, see [Install and Manage Building Blocks](#).

Minimum Learn Version

Blackboard Learn 9.1 April 2014 release only

Resolved Issues

The SafeAssign 4.0.2 Building Block update contains no functional or workflow changes, and you are not required to make any changes other than upgrading your SafeAssign Building Block.

- For integrated assignments, when you uncheck the box to prevent students from seeing SafeAssign originality reports students no longer see the percentage match in Grade Center and when they revisit the assignment.
- When submitting, if a student both adds text to the text editor and attaches a file, SafeAssign results are returned as expected and the SafeAssign section of the inline grading panel no longer disappears.

Default State

Enabled

Roles

- Instructors can use SafeAssign to investigate plagiarism potential in assignment submissions.

- If allowed by instructors, students can review their own work for plagiarism potential.
