

SafeAssign Release Notes for Learn April 2014 - October 09, 2014

Release Basics

Building Block Name: SafeAssign

Version: SafeAssign 4.0.6

Date Released: October 9, 2014

Released by:

- Download using Software Updates. The SafeAssign building block appears as an update in the Software Updates module within 24 hours.
- [Download the .war file.](#)

To learn more, see [Install and Manage Building Blocks](#).

Managed Hosting Clients

The Blackboard Managed Hosting team will apply this Building Block on hosted Production systems currently using the April2014 Release during a standard maintenance window. Customers will be contacted in a separate communication with the date and the time scheduled along with the expected impact to the hosted systems. For clients that want the update sooner they may update the Building Block via Software Updates module and create a Support case on Behind the Blackboard to schedule the recommended server restarts (to expedite the scheduling process please include a desired day and time for the restarts to begin).

Minimum Learn Version

Blackboard Learn 9.1 April 2014 release only

Resolved Issues

- SafeAssign Download all Submissions loads a blank page with no "back" to course or "ok" option - Article #38249
- When copying a course with a safeassignment, an error is thrown and the destination does not have safeassign enabled - Article #38833
- Show Student ID Option Does Not Work As Student ID is Always Displayed in View SafeAssign - Article #38268

Default State

Enabled

Roles

- Instructors can use SafeAssign to investigate plagiarism potential in assignment submissions.
- If allowed by instructors, students can review their own work for plagiarism potential.
