Blackboard Learn 9.1 April 2014, October 2014 and Q4 2015 releases only

Markets and Verticals

SafeAssign is available to all markets and verticals.

Resolved Issues & Improvements

- Add Java 8 compatibility
- Address potential security issues associated with 3rd-party libraries

Default State

Enabled

Roles

- Instructors can use SafeAssign to investigate plagiarism potential in assignment submissions.

- If allowed by instructors, students can review their own work for plagiarism potential.

Managed Hosting Clients

The Blackboard Managed Hosting team will apply this Building Block on hosted Production systems currently using the April 2014, October 2014 or Q4 2015 Release during a standard maintenance window. Customers will be contacted in a separate communication with the date and the time scheduled along with the expected impact to the hosted systems. For clients that want the update sooner they may update the Building Block via Software Updates module and create a Support case on Behind the Blackboard to schedule the recommended server restarts (to expedite the scheduling process please include a desired day and time for the restarts to begin).
