Web Community Manager 2018 Release 1 (2.22)

Continuous Delivery 2.22 | Release to Production February 2018
New Features, Updated features

Continuous Integration with Blackboard Ally

If you have licensed Blackboard Ally, you can assess the accessibility of your Web Community Manager site content and files. View high-level reporting from a Site Workspace in Site Manager.

The screenshot shows the Blackboard Site Manager interface for a site named "USQA District Site name". The left sidebar contains navigation options like "USERS & GROUPS", "CONFIGURE", and "SITE & CHANNELS". The main content area is divided into "Current Pages" (listing "Homepage" and "Calendar"), "Tweets" (featuring a tweet from @CEengagementTips), and the "Ally Accessibility Report" widget. The report shows a 98% score and a list of issues: 1 severe, 1659 major, and 1509 minor. The report widget is highlighted with a red border.

Ally provides accessibility scores to measure accessibility of pages and files. When you upload content to your workspace it syncs with Ally. After the content syncs with Ally, your accessibility report is displayed in the Ally Accessibility Report section of your Site Workspace in Site Manager.

You can now view the Ally widget in other languages due to our internationalization update. To view the widget translated into other languages, you need to change the default language in your browser first and then refresh your Site Workspace in Site Manager.

Select *Overview* in the Ally Accessibility Report for detailed reporting. To learn more, see [Ally Institution Report](#).

 Please note that Courses in the report refer to Sections on your site.

Calendar Upgrades - Month View

The calendar has a new streamlined and modern appearance. It is now more user-friendly, accessible, and responsive, with improvements made to the keyboard navigation and Voiceover. There are month, day, and list views.

In the month view, users can:

- *Customize Calendar View* to select the calendars and categories that display. Categories are indicated by a color associated with events.
- Use My Events, iCal, RSS, print, and export to keep track of the events they are interested in.
- Navigate between months using the *Preview* and *Next* arrows.

- See today's date.
- See *All Day* indicators for events that are all day
- Select *More* on days that have more than 5 events scheduled to see the Day view.

Calendar upgrades – Day View

The Day view shows all events within a 24-hour period. Users can navigate through the week and see a category overview for each day in the week.

- See the current week and use the *Previous* and *Next* arrows to change weeks. When a week falls between two months, the dates in the current month are black and the previous or next month are grayed out
- See an overview of up to three event categories for each day.
- Select an event for more details.

Calendar upgrades – Event Detail

Event details has a new streamlined and modern appearance as well. It is now more user-friendly, accessible, and responsive.

Calendar upgrades – List View

Use the List View to see the events for the week. Use the Previous and Next arrows to see other weeks. Select events to see more details.

Resolved Issues

We have resolved the following issues in this release. We've listed the issues as they were originally entered and in the order that they were reported.

Functional Area	Subject
Apps	Deleted apps displaying in Google searches. When a user deletes an app, the page is still able to be viewed when searched in Google until Google crawls the page again.

Functional Area	Subject
Photo Gallery	Photo Gallery Attachment - cannot save an app record with photo gallery attached. After a photo gallery is attached to an app record, the record cannot be saved. A blank error box is shown.
Section	Restore a Section - Escape button doesn't work properly. The Escape key closes Restore Sections dialog instead of the confirmation dialog.
Section	Delete a Section - Escape button doesn't work properly. The Escape key closes Restore Sections dialog instead of the confirmation dialog.
Staff Directory	Cannot export a Staff Directory if the app name has a period (.) in it. If a staff directory has a period in the app name, you cannot export it.
